

PRAVIN DEVADAS JORIGAL

Senior Backend Engineer (8 YOE) | Java | Spring Boot | Microservices

JORIGALPRAVIN@gmail.com | [8149902229](tel:8149902229) | [pravinjorignal](https://www.linkedin.com/in/pravinjorignal)

EXPERIENCE

NAGARRO | STAFF ENGINEER (formerly Associate Staff Engineer & Senior Engineer)

03/2022

- Led end-to-end modernization of legacy IBM WebSphere applications to **Spring Boot 3 microservices**, improving scalability, maintainability, and system resilience
- Designed and developed high-performance **REST APIs** using Spring Boot, **Java 17**, and Oracle DB, serving ~50K–100K requests/day for a large-scale insurance platform
- Utilized AI-assisted coding (**GitHub Copilot**) to accelerate development of complex business logic, multithreading workflows, and integration layers, improving development efficiency and code quality
- Engineered and delivered “Welcome Experience – Quick Registration” feature, enabling **millions of user registrations** and improving onboarding conversion by ~**60–70%**
- Reduced API latency by **75% (~6s → ~1.5s)** using async processing (CompletableFuture), caching, and query tuning
- Drove migration to Java 17 and Spring Boot 3, resolving **100+ vulnerabilities** and ensuring zero-regression deployment across environments
- Integrated **Redis caching** and **IBM MQ (SSL)**, and migrated SOAP services to Jakarta standards
- Enhanced system observability by implementing **structured JSON logging** and Splunk dashboards, reducing RCA time from hours to minutes
- Minimized production issues by **25–30%** via standardized error handling and consistent error code architecture
- Modernized core business modules (Shopping Cart, Commissions, Forms, Group Search), enabling full transition to microservices and supporting horizontal scaling across services
- Acted as offshore backend co-lead for a team of 4–5 engineers, mentoring developers, conducting code reviews, and driving engineering best practices
- Managed production releases and critical incidents for **99.9% uptime system**, ensuring zero downtime

WIPRO | PROJECT ENGINEER

07/2018 - 03/2022

- Developed and enhanced Spring Boot REST microservices for a large-scale banking onboarding platform
- Implemented advanced search filters and refined existing services, **improving response time** and overall user experience
- Built a dedicated microservice for Excel data export, enabling **efficient processing of large datasets** and improving client data accessibility
- Designed and optimized SQL queries using MyBatis and Oracle PL/SQL for **critical workflows** and transactional data processing
- Improved query performance by restructuring inefficient SQL and introducing reusable functions, **reducing load times** across multiple modules
- Managed database objects (tables, views, stored procedures, functions) in **Oracle 19c** for reliable data access
- Contributed to code reviews, integration testing, and defect resolution, ensuring high-quality releases and **stable deployments**
- Collaborated with client stakeholders on Phase 2 requirements, proposing **architecture and performance improvements** adopted in production

TOOLS & SKILLS

Languages & DB:	Java (17), Oracle SQL, PostgreSQL
Frameworks:	Spring Boot, Spring MVC, Spring Data JPA, REST APIs
Architecture:	Microservices, Distributed Systems, API Design
ORM & Data Access:	Hibernate (JPA), MyBatis, Query Optimization
Caching & Messaging:	Redis, Apache Kafka, IBM MQ
DevOps & Tools:	Maven, Git (GitHub, Bitbucket), CI/CD Pipelines (Jenkins), AWS, Docker
AI Tools:	GitHub Copilot (AI-assisted coding)
Observability:	Structured Logging, Splunk, Production Monitoring & RCA
Testing:	JUnit 5, Integration Testing
Core Strengths:	Performance Optimization, Legacy Modernization, Secure API Design, Code Reviews & Mentoring

EDUCATION

INTEGRATED M. TECH (IT) - BITS, Pilani	Achieved 8.25 GPA across attended 6/8 semesters.	2018-2022
B. Sc (IT) - BNN COLLEGE (Mumbai University)	Completed bachelor's degree with 88% .	2015-2018

ACHIEVEMENTS & CERTIFICATIONS

- Recognized by stakeholders for ownership and reliability in critical production deliveries across multiple releases
- **Certifications:** Java Concurrency & Performance Optimization (Udemy), Kafka (LinkedIn), Domain-Driven Design (LinkedIn)
